

CV Per Olof Arnäs

Dr Per Olof Arnäs is a Senior lecturer in Logistics at Chalmers University of Technology since 2011. Previously, he spent eight years working for a large portion of the Swedish haulage industry on strategic issues regarding Logistics, ICT, Environment, Safety, Energy, Efficiency, and Education. He is one of the founders of the transport ICT standardization organisation MSI Group, of which he was chairman from 2007-2011.

He holds a MSc in Mechanical Engineering (1996) and a PhD in Logistics (2007) from Chalmers University of Technology. His area of research is focused on the digitization of freight transport, both how it is developing and how it can be used once in place. He is also involved in the Swedish mobilization on transport efficiency called CLOSER.

He also has a previous background working in the haulage industry at different positions such as traffic and vehicle management.
