

## CV

Jose Gato Luis has a master degree in Computers Engineering with eight years of experience in ICT sector in the fields of software development, OpenSource and innovative technologies. Currently he is working as technical coordinator in Atos Research & Innovation (ARI). He has also previous experience as researcher in European and National projects based on open source, mobile technologies, social networks, augmented reality, data mining and semantic, such as QualiPSo or GoMyLife. In this moment, he is involved in European Commission projects (in the fields of effectiveness and efficiency for manufacturing, logistics and transport) such as Cassandra, eDash and iCargo, leading technical coordination and development tasks. Besides Atos, he is teaching in a Master Degree of the University Rey Juan Carlos about open source software technologies. Before Atos, he was working in a research group of this University, where he was leading different research projects at the cutting edge of technological innovation.
